

## Products

### [Portable Roadways](#)

Our unique product range ensures that we supply the most suitable access solution, based not only on your bespoke needs, but also on taking into consideration your ground condition.

### [Pedestrian Walkways](#)

Product innovation is key to TPA, so by listening to our clients' needs we are continually designing and enhancing existing products to extend our product offering. This means that as well as being able to supply some of the more traditional pedestrian walkway equipment such as Supa-trac and Terratile, we can also offer products that are unique to TPA.

### [Fencing](#)

Fencing is a product that TPA can easily integrate into any contract as both the panel system and MD40 roll can be installed as a fortress fence. Secure gates can also be included within a fence structure. Undulating ground is tackled using the steerable panels which then ensure a neat & professional finish on inclines.

### [Bridges](#)

TPA is able to supply a range of bridges to cross a variety of voids including roads, railways or raging torrents! Pedestrian bridges are available to a 45m clear span, and vehicular (100 tonne gross load) to a 20m clear span. Any bridge supplied will fully comply with all current legislative requirements.

### [Stairways](#)

TPA promotes two ranges of stairways that are portable and for temporary use, making them ideal to use on construction sites, rail embankments and at outdoor events.
